Java training task

1. range of short and int

   * range of short : -32,168 to 32,767

   * range of int: -2,147,843 to 2,147,483,647

2. use of ',' in Java

   * In Java ',' is used as a seperator.
   * used to seperate variable declarations

     ie. int a=1, b=2;

   * used as seperators for parameters and arguments of a function.

3. why Filename and classname must be same in Java?

   * It is done so that the Java virtual machine quickly and consistently locate the correct class files.
